G700

TECHNICAL SPECIFICATIONS

EVERY NUMBER TELLS A STORY OF POWER

From dimensions that command presence to capabilities that demand respect, the G700's stats speak louder than words. Measuring 5153 mm long and 2050 mm wide, with a solid stance of 1960 mm in height, it confidently rides on a 2850 mm wheelbase. With 230 mm of ground clearance and water-wading depth of 900 mm, no road is too wild. The 2.0TD turbocharged engine works in sync with two electric motors, producing a total of 665Kw/891hp and 795 Nm torque — launching you from 0 to 100 km/h in just 4.6 seconds. And with a 100-liter fuel tank and a 34.13 kWh battery, it delivers a massive combined range of 900 km.

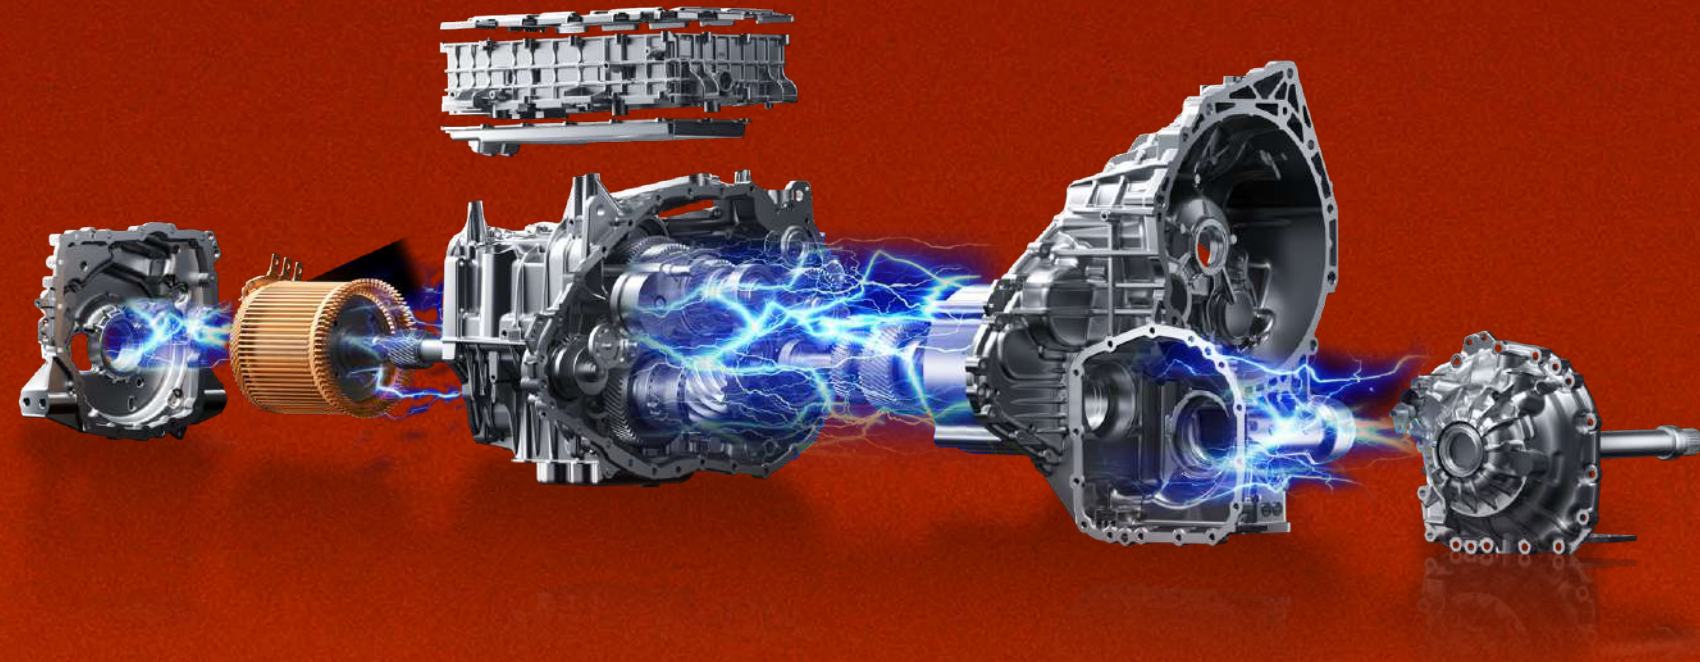

HARDCORE STYLING

WHERE FORM IS FIERCE AND FUNCTION IS FEARLESS

The G700 isn't just styled — It's sculpted for strength. Its bold front fascia cuts through wind and doubt alike. Every contour is engineered, every line a nod to off-road resilience. Its non-load-bearing body is built to tackle extremes, offering approach and departure angles of 35° and 28° respectively. From the high shoulder line to the sharp LED matrix eyes, it looks ready to pounce — because it is. This is an SUV that never whispers luxury. It roars it.

POWERTRAIN

THE HEART OF A BEAST. THE BRAIN OF THE FUTURE.

Under the G700's skin lies an extraordinary union of gasoline force and electric finesse. Its 2.0TD engine, placed front and vertical, works hand-in-hand with dual permanent magnet synchronous motors. With 210 kW at the front and 300 kW at the rear, it balances brute power with whisper-silent operation. Thanks to the two-speed Dedicated Hybrid Transmission, every turn of the wheel feels instinctive — and electric. This is driving as it should be: immediate, intelligent, and intensely thrilling.

ELECTRIC 4WD SYSTEM

TOUGH GETS SMARTER WITH EVERY TURN

Don't just go off-road. Go off-script. The Jetour G700's full-time electric 4WD system delivers intuitive traction control, giving you power where and when you need it. With features like tank turn, creep mode, and transparent chassis view, it's built for precision in the wild. The locking differentials — front and rear in the FLAGSHIP trim — keep your path steady over loose terrain. Whether crawling up rocky ascents or gliding over sand, this SUV understands terrain like a second language.

INTERIOR COMFORT

LUXURY, LAYERED WITH LOGIC

Step inside and leave the world outside. The G700's interior is designed to indulge — from soft-touch surfaces to adaptive seating. Choose between 2+3 or 2+2+2 layouts, depending on trim. In the front, fully electric seats with ventilation and lumbar support await. LUX and FLAGSHIP trims add massage functionality and memory presets, while second-row passengers enjoy electrically adjustable leg rests. FLAGSHIP even offers an electric third row. Every ride becomes a retreat.

CLIMATE & AIR CARE

CABIN CLIMATE, CRAFTED TO YOUR COMMAND

Whether navigating city heat or desert chill, the G700 keeps conditions perfect with automatic tri-zone climate control, rear independent A/C, and CN95 PM2.5 filtration. Add a car fragrance system and you have an environment as refined as it is refreshing. This SUV doesn't just cool the cabin — it elevates the atmosphere. Even long drives feel like five-star stays.

INNOVATIVE TECHNOLOGY

SCREENS THAT ANTICIPATE. SOFTWARE THAT UNDERSTANDS.

The cockpit is no longer a cabin — It's a command center. The G700 surrounds you with an ultra-wide 35.4-inch digital instrument display, complemented by a 15.6-inch central touch-screen that's both sleek and responsive. Rear passengers enjoy their own cinematic escape with a 17.3-inch screen in the FLAGSHIP trim. With Apple CarPlay, Android Auto, Bluetooth, voice commands, and Snapdragon 8255 powering it all, the G700 keeps you connected, informed, and in control at every turn.

SOUND SYSTEM

EVERY DRIVE DESERVES A SOUNDTRACK

From everyday playlists to cinematic journeys, the G700 delivers an acoustic experience worth remembering. The COM trim offers a robust 12-speaker system, while LUX and FLAGSHIP are equipped with an 18-speaker Lexicon audio setup. Only the FLAGSHIP trim unleashes full Dolby Atmos surround — creating an immersive sound dome that moves with you. Whether it's a conference call or Khaleeji beats, the sound is rich, balanced, and breathtaking.

SAFETY

SMART IS THE NEW STRONG

The G700 doesn't just protect — it predicts. Standard features include multiple airbags, ABS, ESP, TCS, and Autohold. Step into LUX & FLAGSHIP and experience Level 2 autonomous driving: Adaptive Cruise Control, Lane Keeping, Lane Centering, Traffic Jam Assist, Blind Spot Detection, and more. With 360° camera systems, parking aids, and real-time collision alerts, the G700 watches every angle so you can focus on the horizon.
